

# Città del Tabacco

## National

The legislation on tobacco has been developing for several years at international level. In 2001 the European Community promulgated a directive on the approximation of the laws, regulations and administrative provisions of the member states concerning the manufacture, presentation and sales of tobacco products. Its text is currently under review to introduce changes which take into consideration also the guidelines of the Framework Convention on Tobacco Control (FCTC), the first international treaty of the World Health Organization (WHO).
